For Immediate Release:

BugZip® Luggage Encasements Now Available at Bed Bath & Beyond®
Helping travelers have a secure peace of mind in all their endeavors

Northbrook, IL (January 25, 2010) -- Vantzen Products Inc., the designer of the first bed bug resistant travel and clothing encasements, is proud to announce that Bug Zip® is now available nationwide at select Bed Bath & Beyond® locations and online at www.bedbathandbeyond.com.

[BugZip®](#) luggage and clothing encasements are made of heavy-duty clear vinyl that resists tears and can easily hold large objects. Simply place your entire suitcase, garment bag or clothing inside an encasement and zip it securely. The specially designed three-sided bed bug resistant zipper allows easy access to your clothing and belongings while “zipping” out bed bugs when they are on the move. It comes in four convenient sizes, is simple to use and easy to pack in your suitcase. BugZip® is perfect for use in hotels, hospitals, cruise ships, and other travel destinations.

“No place is safe from these tiny little vampires that have made comeback in the last 10 years. Our product BugZip® was designed to stop the vicious cycle of bed bugs hitching a ride home with you on your clothing or suitcase and give you a secure peace of mind while traveling.” said Adam Greenberg, president of Vantzen Products, Inc. “We are extremely excited to be offering our product in Bed Bath & Beyond® stores.”

About Vantzen Products Inc.

At Vantzen Products Inc. our mission is to be an innovator in bed bug prevention. BugZip® is our revolutionary attempt to stop the bed bugs in their tracks.

Founded in 2006, Vantzen Products Inc. was started on a quest by its President, Adam Greenberg. After learning of the horror of living with bedbugs and finding them under his mattress while taking a cruise with his family, Adam set out to stop the spread of bed bugs into people's homes. Extensive research and development has produced the innovation of BugZip®, the world's first bed bug resistant luggage encasement. For more information, visit www.bugzip.com.
